Piyush Kumar

Computer Science and Engineering Student — Faridabad, Haryana
iampiyushkumar069@gmail.com — +91-9318432741 — GitHub: Piyush069kumar — LinkedIn: pk069

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building backend services using Node.js, TypeScript, REST APIs, databases, and event-driven architectures. Experienced in developing scalable systems using Kafka, Redis, Docker, and CI/CD, with a strong foundation in data structures, algorithms, and software architecture. Proficient in leveraging AI-powered development tools such as Google Antigravity and Stitch to accelerate development, improve productivity, and deliver reliable solutions through critical evaluation and validation of AI-generated outputs.

EDUCATION

Degree	Institution	Year	Marks/CGPA
B.Tech CSE	Gurukula Kangri University, Haridwar	2023–2027	8.11 CGPA (6th Sem)
Sr.Secondary (XII)	Navodaya Vidya Niketan Sr. Sec. School, Faridabad	2022	88%
Secondary (X)	Navodaya Vidya Niketan Sr. Sec. School, Faridabad	2020	81.6%

TECHNICAL SKILLS

Languages	C++, JavaScript, TypeScript
Backend	Node.js, Express.js, REST APIs
Frontend	React.js, Next.js, HTML, CSS, Bootstrap, Tailwind CSS
Database	MySQL,Redis
Tools	Git, GitHub, Docker, CI/CD
CS Fundamentals	Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Peymagen Informatics & Automation Pvt. Ltd. Internship Certificate

Full Stack Development Intern Aug 2025 – Feb 2026

- Contributed to the development and maintenance of **i-Note Generator**, an internal government-use document management application.
- Developed responsive user interfaces using **React.js** and integrated frontend components with backend services through **REST APIs**.
- Implemented new features and resolved application issues in collaboration with senior developers.
- Worked in an agile development environment to support feature development, testing, and bug resolution.

Peymagen Informatics & Automation Pvt. Ltd. Certificate

Part-Time Web Developer Mar 2026 – August 2026

- Develop and maintain full-stack web applications using **Node.js**, **Express.js**, **React.js**, and **MySQL**.
- Develop and integrate **RESTful APIs** for communication between frontend components and backend services.
- Implement backend features, manage application data, and write **MySQL** queries to support application functionality.
- Troubleshoot production issues, optimize application performance, and collaborate with the development team on testing and deployment.

Technologies: Node.js, Express.js, JavaScript, React.js, MySQL, REST APIs, Git

PROJECTS

Scalable Notification Architecture GitHub

- Built an event-driven notification service using **Node.js/TypeScript** with asynchronous message processing through **Apache Kafka**.
- Designed modular notification providers for multiple delivery channels using **Factory, Composite, and Decorator** design patterns.
- Implemented **Redis-based caching** and reliability mechanisms including retry handling, dead-letter processing, and circuit-breaker patterns.
- Exposed notification functionality through **REST and gRPC** interfaces and containerized the system using **Docker**.

Full-Stack Blog Platform Github

- Built a full-stack web application using **Next.js** and React.js for a responsive, accessible user interface and Node.js/Express.js for backend REST APIs.
- Designed and queried a relational database using **PostgreSQL** to manage application data, ensuring data integrity and efficient data retrieval.

- Containerized the application using **Docker** and Docker Compose and implemented **CI/CD workflows** to automate application build and deployment.
- Implemented secure authentication and authorization using **JWT** and **bcrypt** password hashing.

Face Attendance System Team Project
React, Node.js, Express.js, Django, Python, PostgreSQL

- Developed a full-stack attendance platform using facial recognition and GPS-based geo-fencing to automate and validate attendance.
- Built REST APIs and integrated React.js, Node.js/Express.js, and Django services for attendance processing, user management, and location validation.
- Designed PostgreSQL-backed data management for users and attendance records, with responsive interfaces for monitoring attendance.

CERTIFICATIONS

- NPTEL – The Joy of Computing using Python
  Score: 70% – Elite Certification
- **Udemy** – Software Architecture & Design of Modern Large Scale Systems
  Instructor: Michael Pogrebinsky — 8 hours *(Apr 2026)*

ACHIEVEMENTS & LANGUAGES

Team coordinator in college events. **Languages:** English – Fluent — Hindi – Fluent
